DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 06/26/2007 has been entered. Claims 1-19 are pending, wherein claims 7-18 are withdrawn from consideration and claims 1-6 and 19 are under consideration.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mark D. Saralino on 09/07/2007.

The application has been amended as follows:

- In Claim 1, line 7; "selection" has been changed to --section--.
- The withdrawn claims 7-18 have been cancelled.

Reasons for Allowance

3. The following is an examiner's statement of reasons for allowance:

- With regard to independent claim 1; as the closest reference of record, Diezmann et al (US 6,044,046) shows an optical disc CD including: an antenna 11 (Column 3, lines 19-23) formed along a circumferential direction; and an IC 12 (Column 3, line 49 and column 2, lines 16-17) for transmitting/receiving radio waves via the antenna (Column 3, lines 19-25); the IC of the optical disc includes at least one of a time adjusting section for adjusting a response time of a response signal (Column 108, lines 16-22), the response signal being a signal in response to a reception signal received by the optical disc; **but fails to show** a frequency setting selection for selecting a frequency for the response signal.
- Applicant assert; in such device, even when a plurality of optical discs are present within the scope that the radio waves from the remote control can reach, the remote control can separate signals transmitted from a plurality of optical discs with respect to the frequencies and detect them. In this way, collision of the response signals from a plurality of optical discs can be prevented (Specification, pp. 16-17).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
